Cylindrical Roller Bearings

1. Photo:

2. Category:

- Single-Row cylindrical roller bearings
- Double-Row cylindrical roller bearings
- Four-Row cylindrical roller bearings

Also we can design and manufacture other types of cylindrical roller bearings for customers with special requirements.

3. Cages:

Most cages for DES single row cylindrical roller bearings are pressed steel cages or machined brass cages. According to different working conditions and customers requirements cages with other design and structure could be supplied.

4. Applications:

Cylindrical roller bearings are mainly used in the medium-sized motor, high capacity motor, generator, internal-combustion engine, combustion gas turbine, the main shaft of machine tool, graduating device, machines for loading, unloading, carrying and all kinds of machines.
