## Thrust Ball Bearings

### 1. Photo:

### 2. Category:

- Single direction thrust ball bearings
- Double-direction thrust ball bearings
- Angular contact thrust ball bearings
- Thrust ball bearings with outer cover

We can also provide thrust ball bearings with other special structures such as thrust ball bearings without cages, unidirectional thrust ball bearings with taper bores, unidirectional thrust ball bearings with steel wire raceway and etc.,

### 3. Cages:

Cages of thrust ball bearings are pressed steel cages achined solid cages made of brass or bronze special fabric reinforced phenolic resin cages and etc.,

### 4. Specification:

Thrust ball bearings:

- Inner diameter: 25~1380mm
- Outer diameter: 42~1540mm
- Width: 11~160 mm

### 5. Applications:

Thrust ball bearings are mainly used to bear the axial load. They can transmit the large axial load, but can not bear the radial load. Thrust ball bearings are mainly used in the car steering gear and the main shaft of machine tool.
