## Slewing Bearings

### 1. Photo:

### 2. Category:

- Four-point contact ball slewing bearing
- Double-row four-point contact ball bearing
- Crossed cylindrical roller slewing bearing
- Crossed tapered roller slewing bearing
- Three-row cylindrical roller slewing bearing

### 3. Specification:

The dimension range of slewing bearings that we can manufacture is inner diameter  $\geq 80\text{mm}$ , and outer diameter  $\leq 6070\text{mm}$ .

### 4. Cages:

The cages of DES slewing bearings have different structures such as whole type, sectional type and separate type. Among which cages of whole type and sectional type are made of #20 steel or ZL102 aluminum casting alloys. Cages of separate type are made of polyamide resin 1010 ZL102 aluminum casting alloy or QA110-3-1.5 aluminum bronze. In present years with the development of material industry, Nylon GRPA66.25 is also widely used to produce sectional cages.

### 5. Applications:

Slewing bearings are widely used in the slewer of Hoisting and Conveying Machinery, mining machines, constructional machines, harbour machines, wind power generation machines, armarium, radar and missile launcher.
