## Spherical Roller Bearings

### 1. Photo:

### 2. Category:

- Cylindrical hole Spherical Roller Bearing
- Tapered Hole Spherical Roller Bearing
- Vibrating screen Spherical Roller Bearing
- Split Spherical Roller Bearing

Also we can design and manufacture other types of deep groove ball bearings for customers with special requirements. The following bearings can be supplied.

- Spherical roller bearings with fixed flange have flanges on both sides of inner ring. In the middle there is a fixed middle flange at the two sides of inner ring and two cages.
- Spherical roller bearings are generally open style. Closed types with seals at both sides are also provided. It can be divided into contact and non-contact style (low friction).
- In order to do lubrication easily we can provide the bearings with groove and holes on outer ring.

### 3. Cages:

Spherical roller bearings cages of the bearing type C are pressed steel and glass fibre reinforced polyimide. CA type adopts brass solid cage. Different kinds of material have different codes to be expressed.

### 4. Specification:

- Inner diameter: 30~1800mm
- Outer diameter: 68~2180mm
- Width: 20~530mm

### 5. Applications:

Spherical roller bearings can be used in different kinds of machineries, such as steel, mining, papermaking, vessels, textile machinery coal mill and electric power.
